Abstract: Background: The impact of COVID-19 on mental health is tremendous. Since the beginning of the pandemic, several actors have raised concerns about the impact of the pandemic on **gambling**. Many actors fear a switch to online **gambling** in the context of the closure of many land-based **gambling** activities due to the restrictions imposed by public health authorities, such as physical distancing and lockdowns. This switch is worrisome because online **gambling** is considered a high-risk game. In that context, we need to know more about the impacts of the pandemic on **gambling**. This scoping review aims to summarize the literature that addresses the impacts of the COVID-19 pandemic on **gambling**. To our knowledge, this is the first review to focus on this subject. Methods: An electronic literature search involving a strategy using keywords related to COVID-19 and **gambling** was conducted using MEDLINE, Academic Search Complete, CINAHL, PsychINFO, Social Works Abstract, and Socio Index databases on February 25th 2021. This search was combined with a manual search in Google Scholar. To be included, studies had to discuss **gambling** and COVID-19 as a primary theme, be written in English, and be published in a peer-reviewed journal. After collecting the information, we collated, summarized, and reported the results using narrative synthesis. Results: The search identified 181 articles. After the removal of duplicates and screening, 24 full-text articles were reviewed and included in this study: 14 original articles, 8 commentaries or editorials, and 2 protocols. Contrary to expectations, preliminary evidence suggested that **gambling** behavior often either decreased or stayed the same for most gamblers during the pandemic. However, for the minority who showed increased **gambling** behavior, there was frequently an association with problem **gambling**. Conclusion: The available literature on COVID-19 and **gambling** is limited and the impact of the COVID-19 pandemic on **gambling** behavior and **gambling** problems is still unclear. Therefore, there is a need for more research on this topic, both qualitative and mixed methods studies, to better understand the impact of the pandemic on **gambling**. Considering the results, we need to be careful, particularly with problem gamblers and other subgroups of the population who seem to be more vulnerable to increased **gambling** habits during this pandemic period. The screenshot shows the EBSCOhost Save Manager interface. At the top, there is a navigation bar with links for 'New Search', 'Thesaurus', 'Indexes', 'Sign In', 'Folder', 'Preferences', 'Languages', and 'Help'. Below this, the 'Save Manager' logo is visible, along with 'EBSCOhost' and a 'Back' link. The main content area is titled 'Articles' and shows 'Number of items to be saved: 1'. A checkbox labeled 'Remove these items from folder after saving' is highlighted with an orange box. Below it is a yellow 'Save' button. To the right, there are options for 'Include when saving:', with 'HTML link(s) to article(s)' checked. Under 'Standard Field Format', there is a dropdown menu set to 'Detailed Citation and Abstract'. Under 'Citation Format', there is a dropdown menu set to 'APA 7th Edition (American Psychological Assoc.)'. The 'Customized Field Format' option is also visible.

Möchte man gespeicherte Elemente nach dem Export aus dem EBSCO Ordner entfernen, hat man hier gleich die Möglichkeit.

Hier hat man die Möglichkeit verschiedene Formate auszuwählen (z.B. mit Abstracts, in APA-Style formatiert) oder in einem ganz eigenen Format zu speichern.
